

QooCam Shooting Guideline

The Best Way to Hold the Camera and Take 3D Photo/Video

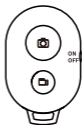

As shown in the picture, hold the rear part of camera between your index finger and thumb to take 3D photo/video, so fewer part of the hand can be captured in the photo/video.

If it is inconvenient to press the shooting button in this way, we suggest you use QooCam APP or bluetooth remote controller when taking 3D photo/video.

① QooCam APP

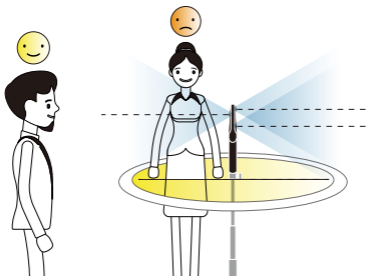

② bluetooth remote controller

360 panorama shooting

The subject should face the front of the camera lens, which will contribute to better stitching effect. The closer the object is to the camera, the more likely it is to be stitched incorrectly.

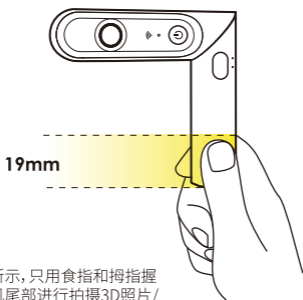

OTG Cable

The Firmware with OTG function for mobile phone will be updated later and please wait for our further announcement.

手持相机拍摄3D照片/视频

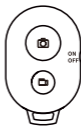

如图所示, 只用食指和拇指握住相机尾部进行拍摄3D照片/视频, 可使图像中被拍到手的部分更少。

另外, 因手持相机尾部, 不好操作拍摄键, 建议手持相机拍3D照片时, 用QooCam APP或蓝牙遥控器控制拍照。

① QooCam APP

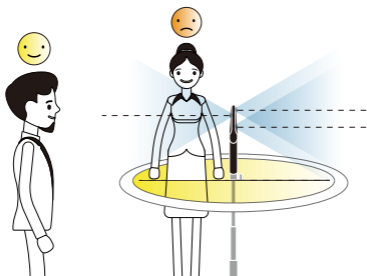

② 蓝牙遥控器

360全景拍摄

被摄主体应面向相机镜头的正面, 将有助于更好的拼接效果。被摄物体距离相机越近, 拼接错误的可能性越大。

OTG Cable

具有OTG连接手机功能的固件将在后续更新, 请等待我们的进一步公告。
